Flag Sets Not Intended For Outdoor Display. See [Page 11](#) for Indoor Flag Set Boxing Options.

Standard Ferrule

Special Ferrule

Where indicated below, our ornaments can be used with a ferrule. A ferrule is used for indoor use on wood poles. When using an ornament for an indoor aluminum pole with a top adapter already installed, a ferrule is not required. The exception to the above is the Elks Head ornament, which is supplied with a threaded rod attached to the bottom and requires a special ferrule for use with our wood indoor poles. Please specify if you require this special ferrule.

HI-IMPACT ABS STYRENE PERCHED EAGLE ORNAMENT

With a shiny multi-layer gold plated finish this eagle is extremely durable. Comes with gold mounting screw. This ABS styrene perched eagle can only be mounted on our oak finished wood poles.

* When ordering a silver pole, gold ornaments are supplied as standard • Pictured banner not included in above pricing.

1" DIAMETER BUDGET ALUMINUM LEAD PARADE BANNER POLES

- Finish choices include silver mill, or shiny bright-dipped gold anodized.
- Poles come with gold plated plastic acorn ornaments on each end.
- Two piece poles are coupled together with a solid brass, precision-machined screw joint.
- Poles come complete with flag rings.
- Pole length was determined by allowing 2" on each side for the acorn ornaments and 6" on each side for hand positions.

FEATHER FLAG ACCESSORIES

TELESCOPING SUPERFLEX™ POLES

FOR 12' X 26" FEATHER FLAGS

These fiberglass flagpoles sway in the breeze producing a dramatic, attention-getting display. Available in both 15' and 21' exposed height sizes. The 15' pole is adjustable from 6' to 15' while the 21' pole is adjustable from 8' to 21'. Poles come with 21" PVC ground sleeve and easy-to-follow instructions.

TEAR DROP FLAG ACCESSORIES

TEAR DROP FLAGPOLE

These continuous tapering, flexible black fiberglass flagpoles measure 14' when fully assembled. The bottom measures 1" and tapers to 1/4" at the top. This 3-piece pole swedges together perfectly and all swedge points are reinforced with stainless steel fittings. Pole is rubber tipped to prevent flag damage. Comes complete with heavy-duty, black canvas carry bag.

ITEM #	1-5	6-11	12+	LBS.
155527	\$123	\$117	\$101	3.7

TEAR DROP POLE IN-GROUND MOUNT

Once installed in the ground, the Tear Drop Flag Pole slips over a rotating spindle. The Tear Drop Pole In-Ground Mount measures a total of 23-3/8" long, with 16" of length under the rotating spindle. Weight = 3.2 Lbs.

ITEM #	1-5	6-11	12+
155528	\$57	\$54	\$49

TEAR DROP POLE SURFACE MOUNT

This rotating base can be permanently mounted or can be temporarily held in place with a heavy-duty water donut. When filled, the water donut holds 2-1/4 gallons of water and weighs 18-1/2 pounds. This water donut installation should only be used when winds do not exceed 5 m.p.h.

ITEM #	1-5	6+	LBS.
155529	\$99	\$95	8.6

BRACKETS, HOLDERS & ACCESSORIES

NEVERFURLS

With NeverFurl® you can fly your flag all day long, every day of the year, and the wind will never wrap your flag around the flagpole. The NeverFurl® kit is easy to install and comes complete with everything needed including instructions and detailed drawings. No additional tools are required.

The design of the NeverFurl® device allows each rotator to work independently with the wind by moving up and down **and** rotating around the pole thereby eliminating flag wrapping. Works with all flag sizes regardless of changes in wind speed or wind direction.

ALUMINUM ANTI-FURL ROTATING POLES

These 2-piece poles are available in a brushed aluminum, white painted or wood grain finish. The top of the pole rotates on ball bearings so the flag won't tangle. There's no need for an unfurling tube.

These poles come with 2 flag fasteners (for flying a grommeted flag) and a snap and swivel ring (for flying flags with a pole sleeve and tab). Use with brackets that accept a 1" outside diameter pole (not included).

WHITE TITAN FLAGPOLE SETS

These flagpoles offer exceptional quality at a budget price. The flagpole tubing sections are heavy-duty 19 gauge first run quality steel. The entire inside length of the flagpole is galvanized to prevent rusting while the outside is beautifully finished with a white powder coating. The tubing sections swedge together perfectly to provide a smooth exterior finish.

STANDARD FITTINGS INCLUDE:

- Gold vinyl ball ornament
 - Pulley assembly
 - Solid braided polypropylene halyard
 - 2 nylon flag snaps
- Cast nylon rope cleat with mounting screws
 - PVC foundation sleeve
 - Easy-to-follow installation instructions
 - Can be shipped via parcel carrier

OUTDOOR FLAGPOLES

Our cone tapered ground set aluminum flagpoles are precision fabricated from new, 6063-T6 tubing utilizing the industry's most sophisticated manufacturing processes. The conical portion tapers approximately 1" in every 5-1/2 feet.

All anodized flagpole shafts are highly polished with fine grain aluminum oxide cloth resulting in a high quality, deep satin lustre finish. This finish represents the ultimate in architectural finishes for aluminum flagpoles. The elegant, soft sheen remains maintenance free. See below for anodized finishes available as standard.

STANDARD & ANODIZED FINISHES

For bronze, dark bronze #313 is supplied as standard unless otherwise specified.

GROUND SET CONE TAPERED ALUMINUM FLAGPOLES WIND LOAD CHART

The map below shows the maximum steady wind expected at an elevation of thirty feet above ground level within a fifty-year period of recurrence. Areas with the same maximum constant or steady wind speed are indicated.

Because wind speeds are usually not constant, and gusts are involved, flagpoles (both flagged and unflagged) are listed in this catalog with a constant wind speed and a 1.3 gust factor.

Flagpoles and their associated wind speeds listed assume that ten percent of the overall length of the flagpole is buried at or near ground level per industry recommendations. Special engineering may be required for other applications such as wall or roof mounted flagpoles. Contact us for a prompt response regarding any situation that may require special engineering.

Safe flagpole design requires knowledge of the loads to which they will be subjected. Principal load acting on flagpoles is wind load and that load must be carefully determined. Maximum wind speeds to which flagpoles are exposed are dependent upon many factors such as geographical location, whether or not it is in the center of a large city, a small town's outskirts, seashore, at ground level or on the roof of a high building. Wind speeds generally are higher along coastal areas than inland. They are also higher in open country than in the center of cities. Wind speed also becomes greater as height above ground increases. Wind exerts a force on the pole as well as the flag, thus both loads must be added to determine total load. Flags of different sizes are designed to be flown from different poles.

It's important that flagpoles be selected which are capable of supporting the largest flag intended to be flown in the highest wind speed to which it will be subjected. Loads on flagpoles are resisted by the mounting foundation, roof, or wall to which it is secured.

PLEASE NOTE: recommended flag sizes throughout this catalog do not represent a warranty that the flag size shown may be safely flown in all wind speeds. Personal injury, flagpole damage or property damage can occur when flying oversized flags and banners or flying flags in higher winds than recommended.

SECTIONAL SPECIAL BUDGET SERIES

External Halyard Ground Set Cone Tapered Aluminum Flagpoles

Looking for an excellent way to reduce your shipping costs on 20 ft. and 25 ft. aluminum flagpoles?

Eder Flag's three section 20 ft. and four section 25 ft. Special Budget Series flagpoles can be shipped via parcel carrier!

These popular poles are:

- Simple to install and come complete in a boxed set with all the standard accessories.
- Easy to store in your warehouse or backroom.
- Available in satin, clear, bronze and black anodized finishes.

This line of commercial grade flagpoles, manufactured using 6063-T6 aluminum tubing, can be used in both residential and commercial applications. These cone tapered flagpoles have the elements of a one piece pole with the advantage of low shipping costs.

Add \$60.00 to any of the flagpole pricing above for double-cleat/double-halyard flagpoles. Add \$38.00 for flash collar.

OUTDOOR FLAGPOLES | Deluxe IH

DELUXE IH SERIES

Internal Halyard Ground Set Cone Tapered Aluminum Flagpoles

These internal halyard flagpoles contain a winch mounted inside the flagpole shaft, operable only with a removable crank handle. As the stainless steel cable unwinds from the winch, it passes up through the inside of the flagpole shaft, over the truck sheave to the outside of the shaft, where the retainer ring provides a sliding anchor. A counterweight, heavily coated with neoprene, attached to the retainer ring, allows the halyard to be lowered or removing the flag. The winch is gearless and self-locking at any point, eliminating the need for a separate brake. This direct drive winch provides rapid raising and lowering of the flag with little effort. This design does not require any welding, thus avoiding discoloration when an anodized finish is desired. No monthly lubrication is needed.

STANDARD ACCESSORIES

- Cast aluminum revolving truck with enclosed stainless steel bearings and raceway
- Stainless Steel Cable Assembly
- Deluxe Flag Arrangement
- Retainer ring and counterweight
- M-Winch System
- Spun aluminum flash collar
- Galvanized steel foundation sleeve
- See [page 121-122](#) for optional ornament selections

M-Winch Detail

No welding required, thus no discoloration when anodized.
No monthly lubrication needed.

OUTDOOR FLAGPOLES | Hurricane IH

HURRICANE SERIES FLAGPOLES - WITH M-WINCH

Internal Halyard Ground Set Cone Tapered Aluminum Flagpoles

These internal halyard flagpoles contain a winch mounted inside the flagpole shaft, operable only with a removable crank handle. As the stainless steel cable unwinds from the winch, it passes up through the inside of the flagpole shaft, over the truck sheave to the outside of the shaft, where the retainer ring provides a sliding anchor. A counterweight, heavily coated with neoprene, attached to the retainer ring, allows the halyard to be lowered for fastening or removing the flag. The winch is gearless and self-locking at any point, eliminating the need for a separate brake. This direct drive winch provides rapid raising and lowering of the flag with little effort. This design does not require any welding, thus avoiding discoloration when an anodized finish is desired. No monthly lubrication is needed.

STANDARD INTERNAL POLE ACCESSORIES

- Cast aluminum revolving truck with enclosed stainless steel bearings and raceway
- Stainless steel cable assembly
- Deluxe flag arrangement
- Retainer ring and counterweight
- M-Winch system
- Spun aluminum flash collar
- Galvanized steel foundation sleeve
- See [page 121-122](#) for optional ornament selections

TILTING SHOE BASE FLAGPOLES

All of the cone tapered aluminum flagpoles on [pages 100 through 113](#) with a 3", 4", 5" or 6" butt diameter can be supplied with a tilting shoe base. The tilting base is circumferentially welded to the base eliminating the need for a flash collar. The hinged portion of the base is held in place by (3) stainless steel, Allen head bolts and pivots on a solid aluminum pivot rod. Anchor bolts are furnished for mounting to a concrete base. Not recommended for nautical poles.

- Maximum flagpole height for Tilting Shoe Base mount is 30' exposed
- Tilting Shoe Base is not available with the Hurricane Series Flagpoles
- Adding any Shoe Base mount will reduce the wind rating of the flagpole
- Shoe Base mounts are recommended for grade level mounting only

FOR TILTING SHOE BASE FLAGPOLES, ADD THE FOLLOWING PRICING TO ANY OF THE FLAGPOLES ON [PAGES 100–113](#).

FLAGPOLES | Internal Halyard Parts & Accessories

M-WINCHES

Standard finishes available: Satin, Clear, Bronze #313, White, Black

The maintenance-free M-Winch is gearless and self-locking at any point, eliminating the need for a separate brake. This direct drive winch provides rapid raising and lowering of the flag with little effort. The design does not require any welding, thus avoiding discoloration when an anodized finish is desired. No monthly lubrication is needed. The winch is inserted into the pole and secured with a stainless steel bolt on the back side of the pole. Comes standard with lock and keys. Other sizes available upon request.

Normal appearance of M-Winch while flag is flying or there is no flag being flown.

To remove lock, insert key, turn counter-clockwise and remove the lock exposing the winch insertion slot.

Insert handle into the winch insertion slot, apply inward pressure to locking mechanism and raise or lower the flag to desired position.

Products on Page 134 are intended for replacement parts for Eder Flag product only. The warranty on these products are only valid when used with factory installed Eder Flag shafts. Any after purchase service or warranty, must include invoice details for product and shaft.

If medium bronze #312, light bronze #311 or a custom color is desired please specify when ordering.

STAINLESS STEEL WINCHES

These winches are available for use on flagpoles with a butt diameter of 6" or larger. These gearless winches utilize cast bronze internal brakes which release when a winch handle is inserted and rotational pressure is applied. The winch is locked at any position by removing the handle which engages the brake system. The small size is generally used on flagpoles up to 45', the large size is used on flagpoles from 50' thru 80' and the X-Large size is used on flagpoles higher than 80'. The winch is mounted to the inside of the flagpole with two 5/16"-18NC stainless steel bolts with mounting centers being 3-1/2". Recommended stainless steel cable diameter is 1/8". Monthly lubrication required.

Arrangement shown with 2 Quick Links

STANDARD FLAG ARRANGEMENTS

Constructed of 1/8" stainless steel aircraft cable with a stainless steel thimble attached at each end with 2 copper crimps. These flag arrangements provide the method of attaching the flag or flags to the cable assembly. This is also an excellent method for changing the quantity of flags or the size(s) of flag(s) without having to change the entire cable assembly. Standard flag arrangements are supplied with either 2 or 3 stainless steel quick links depending on the recommended flag size. Deluxe arrangements are supplied with a more complete set of accessories.

CABLE ASSEMBLIES

Constructed of 1/8" and/or 3/16" stainless steel aircraft cable incorporating a stainless steel swivel to minimize the effect of unraveling due to the rotation of the truck assembly. The upper cable section is supplied with a stainless steel thimble, 2 copper crimps, and two ball cable stops, however, because this section must be threaded through the truck assembly, these parts are not attached to the cable before shipment and must be attached in the field. These standard cable assemblies are designed for flagpoles with a winch installed at 4' above grade.

Poly Rope Assembly # 360096 shown

ROPE ASSEMBLIES

These assemblies are typically used in rope style internal halyard flagpoles where a cam cleat has been installed. Comes complete with a zinc plated carbon steel rope thimble attached to one end of the rope and stainless steel quick link.

TECHNORA® ROPE ASSEMBLIES

High performance fibers are encased inside a polyester fiber yarn jacket resulting in a high strength, low stretch, U.V. and abrasion resistant flagpole halyard.

ROPE RETAINER RINGS

Retainer rings are generally used with internal halyard flagpoles by providing a means of keeping the bottom of the flag close to the pole and as an aid to raise and lower the flag. Retainer rings can also be used on large multi-grommet flags on both external and internal halyard flagpoles as a means to keep the flags close to the pole and reduce the strain on the upper and lower grommets of the flag. These roped retainer rings are constructed of 3/16" polyester wire center halyard with a zinc plated carbon steel thimble attached to one end with an aluminum crimp. Complete with stainless steel quick link. Standard colors are White, Silver, Bronze #313 and Black. Please specify color when ordering. If not specified White will be supplied.

FLAGPOLES | Internal Halyard Parts & Accessories

BEADED RETAINER RINGS

Retainer rings are generally used with internal halyard flagpoles by providing a means of keeping the bottom of the flag close to the pole and as an aid to raise and lower the flag. Retainer rings can also be used on large multi-grommet flags on both external and internal halyard flagpoles as a means to keep the flags close to the pole and reduce the strain on the upper and lower grommets of the flag.

These beaded rings are constructed of either 1" or combination of 1" & 2" diameter nylon balls strung onto 1/8" stainless steel aircraft cable with a stainless steel thimble attached to each end with two copper crimps. Complete with stainless steel quick link. The length of each retainer ring is determined by measuring from the outside tip of each thimble (the quick link is not included in the measurement).

INTERNAL HALYARD DOOR & FRAME UNITS

This unit is designed for 5" diameter poles and is used with rope style internal halyard systems. Each unit consists of a hinged door mounted to the front of the frame and a cam cleat (optional) mounted to the back of the frame. The entire unit is inserted into the flagpole shaft and secured with eight 1/4"-20NC stainless steel screws. Minimum hole opening 5-1/2" x 3-1/4". Lock & keys included. Standard colors are Silver, or painted to match Clear, Bronze #313, White or Black. Please specify color when ordering. If not specified Silver will be supplied.

FLAGPOLES | Flash Collars (Split)

STANDARD PROFILE SPLIT ALUMINUM FLASH COLLARS WITH .060" WALL THICKNESS

Satin

A split collar can be useful when replacing or adding a collar to an installed flagpole without removing the pole from the foundation sleeve. The collar is split in half and mounting tabs with screws are installed on the under side of the collar. The quantity and size of the mounting tabs may vary depending on the size of the flash collar ordered.

GALVANIZED STEEL FOUNDATION SLEEVES

The most common type of flagpole installation is the in-ground foundation sleeve method which calls for 1' of the flagpole to be encased in the ground sleeve for each 10' of exposed flagpole height. The diameter of the sleeve should be at least 2" greater than the outside diameter of the flagpole with the area between the flagpole and the sleeve filled with dry sand. Sleeves with a 6" diameter are supplied with a base plate and grounding spike. Sleeves with a diameter of greater than 6" are supplied with a base plate, support plate, grounding spike and, for ease of vertical alignment, steel centering structure welded to the inside of the base plate. If you require other sizes than listed or have special on-site conditions please contact us.

PVC SLEEVES

Poles slip into form fit sleeves snugly - no voids to fill with sand. Standard sleeves require wood wedges & sand for a proper installation.

NON-TANGLE RODS

For Wall Mounted Outrigger Flagpoles

Constructed of 3/8" diameter stainless steel rod. All sizes are supplied complete with a stainless steel fitting which attaches to the grommet of the flag. 30" and 48" long rods are supplied with one stainless steel fitting which attaches to the bottom edge of the flag while the 72" and 84" rods are supplied with three stainless steel fittings which attach to the bottom edge of the flag. **Note: A reinforcing patch must be sewn into the flag in order for the flag clamp to properly attach. Rope and flag must be routinely inspected for wear and loose connections to avoid property damage and/or personal injury.**

Lifetime Warranty

Eder Flag Lifetime Aluminum Cone Tapered Commercial Flagpole Shaft Warranty

Eder Flag Manufacturing Company warrants for their intended use lifetime that the aluminum tapered flagpole shafts that we manufacture will be made of the best workmanship and free of defects in material at the time of shipment. When materials furnished on this job are used for the purpose intended, we hereby warrant the cone tapered aluminum flagpole shaft(s) shipped after May 1, 2017.

This intended use lifetime warranty extended to the original purchaser covers the aluminum cone tapered flagpole shaft only and does not include any accessories or connecting hardware. The accompanying hardware (with the exception of snaps, rope, ornaments or cable) is warranted for one (1) year from date of purchase.

Items damaged by improper installation and/or grounding, overloading with incorrect flag size, accident, vandalism, vehicular impact or neglect by owner are not covered by this guarantee. This shaft warranty does not include failures with following site conditions: wind induced vibrations and corrosive soils with low (under 5) pH values (Alkaline) or high (over 9) pH values (Acidic).

Guarantee will not be honored if any alterations, modifications, or additions are made to our product unless the latter is approved in writing by Eder Flag Mfg. Co., Inc. No claims for labor, dismantling, transportation, or re-erection will be honored. Eder Flag shall not be liable for any other loss or damage, including but not limited to consequential or liquidated damages, or back charges. Material that needs to be returned will require a written authorization form from our firm, which will include correct shipping instructions. Material returned without return authorization will not be accepted.

This warranty excludes any finishes such as powder coating and anodizing processes.

Eder Flag Manufacturing Company will, at its sole discretion repair, replace or credit original Buyer's account for any product that does not conform to this warranty. Eder Flag makes no other warranties, express or implied, which extend beyond the description on the face hereof.

TELESCOPING FLAGPOLE FIVE YEAR WARRANTY

EDER FLAG TELESCOPING FLAGPOLE 5-YEAR WARRANTY

All our Telescoping Flagpoles, carry with them a 5-year warranty from date of receipt. This covers failure due to manufacturing defects but does not cover storm related oversteering of the flagpole. This means if you're flying two flags and you know from weather reports that severe heavy winds are subject to happen in your area, we strongly advise removing the flags so that the resistance on each flagpole section is not compromised which are subject to the internal parts bending or breaking. Photographs of damaged parts, weather reports for the zip code your area would be both need to be sent to your Distributor. If there is a warranty case that is to be honored, we would either repair or replace the flagpole. Parts and labor will be covered, but shipping costs will not be covered. The above points would be related to the telescoping flagpole only. Please address all warranty questions directly with Banner Marketing Group. Please do not contact Eder flag directly.
